Dressed in Best to Die. Incident of Port Arthur Siege.

The London Times publishes the following account written by a Japanese engineer officer of the breaching of the defenses of North Keekwanshan (Cockcomb hill fort) at Port Arthur.

of Metji, part of the walls of North Cockscomb hill fort was blown up by our working party, and the infantry assaulted successfully and occupied the fort securely by the 28th. On that day at about 12.30 p. m. the

working party in the right wing came

across an opening measuring about ten centimeters by ten centimeters, from which issued a strong smell of coal tar. The discovery was made thirty-two meters from the entrance of the gallery leading in from the sixth parallel. After examination we concluded that we had fallen in with the enemy's countermining tunnel. We found it necessary to locate and, if possible, remove the explosive material set for our destruction. This work was intrusted to a party of six men, volunteers from the imperial engineer battalion on the spot-ser geant Katsugi Mitani, corporal Tamejiro Takbashi, first class privates Tomoichi Hori, Kinzo Furusawa, Toshiro Kawabata, and second class private Asataro Matsushita. They understood the desperate nature of the enterprise full well, and, wishing

to die decently, as the gentlemen sol-

diers of Japan should, they dressed in their best and went-to their certain death At 1.30 exactly the sound of a violent explosion rent the air, and the comrades anxiously waiting at the mouth of the gallery were assailed by pebbles, shingles and debris. Mitani, Takahashi and Furusawa were pulled out of the crater by means of the ropes which were tied to their ankles for this purpose, all severely wounded, while the rest sacrificed their lives

at the altar of patriotism and duty.

RISKS OF MINING. Mining is a risky business. Is it extra risky? that is the question. It is frequently said that the failures in mining enterprises are no greater in proportion to the number of persons engaged therein that the failures in other industries. Tais is tantamount to saying that in investing in gold mining one has an equal show to make a winning as if he put his money into any commercial business. But will this view bear scrutiny. Certainly the promise of reward in mining is greater than in any other pursuit. When a prize is gathered in the mining field it is often on a colossal scale, the profits far outranking the gains in other enterprises. It is this hope of a big reward that induces the capitalist to search for underground treasures. A comparatively poor man may in this particular line become a millionaire in a day. This bow of promise it is that always buoys up the the treasury. The silver alone weighs miner with hope and lends a peculiar over one ton, and how a burglar or fascinaion to the calling. No other halt a dozen burglars could tackle avocation can begin to compare with that sort of stuff and expect to get it in this respect. Still to a ceraway with it we leave our readers to tain extent it must be admitted that the miner works in the dark, while other business men operate in the sunlight. A merchant can gauge the conditions and the chances of success with a fair degree of accuracy. He knows there is a demand for goods in his line; that people must buy, if not from him, then from someone else. He may be sadly mistaken as to his ability to hold his own with his competitors, but there is no mistake about the demand for merchandise. The success or failure of his venture depends upon his skill in corralling a remunerative share of the trade. With the miner it is different. He is in a great measure at sea, even when op erating in what is conceded to be a proven mineral field. "Gold is where you find it," is a true saying that applies to all mining sections. The scientist in geology and mineralogy may have a slight advantage over the one unversed in such branches, but practically it amounts to very little. Both the scientist and the novice mus take an equal chance of striking pay ground or a barren spot, and as a mat-We are constrained to call attenter of fact the barren places far out- tion to a matter that number the rich spots. In the assessor's office the assessment roll for townships 2, 3 and 5 is about completed. From these it has been figured out that the exemption of \$100 of personal property for each property holder, will amount in these three townships to \$56,670. At this rate it is calculated that the reduction in the county from this source alone will foot up at least \$75,000. Many persons are assessed for \$100 and the exemption covers the full amount, so they pay nothing in taxes. Nevertheless they have to be put on the assessment roll, otherwise there would be nothing to show that they are property holders liable for jury duty.

A WELL-GUARDED TREASURY.

In the minutes of the supervisors

will be noticed an order for the insurance on the treasurer's office and money to the extent of \$30,000. This order requires some explanation to be understood by the general reader. In fact, no one will understand it without other information than that furnished on the face of the minutes. The court house and hall of records are, and have been right along insured against fire. This is perfectly proper and in accordance with busiless methods. The insurance ordered this week, however is of a different character, and a new departure for Amador county. Nothing of the kind has ever been done before. It is in tended as a protection of the county against loss of county funds by robbery or burgiary. The amount in sured for is outrageously high, \$30 000. We have fire and burglar proof safe and vault, supposed to be proof against assaults of the safe crackers. We never have had a genuine case of safe cracking in this county, and certainly with the protection we now have in the way of modern safe deposit vault, there is less danger from this source than ever. Nevertheless taxpavers, after 50 years of immunity are deemed to be in need of further protection against burglars to the tune of \$30,000. Let us examine. According to the last count there was \$50,000 in the treasury, including warrants uncancelled for \$15,000 in was in silver, and it is urged that this superabundance of silver is the main reason for this insurance policy, inasmuch as it is so bulky that it cannot be all got in the safe proper. So that the insurance covers nearly the full value of all actual money in

say. The thing is so absurd that it will create a smile throughout the county. Nevertheless, the scheme was put through and Amador county we suppose will have to stand it. It is claimed as one reason for this ridiculous step, that the treasurer's official bond does not cover a bona fide robbery, the bondsmen would not be liable for the act of burglars. A poor excuse is better than no excuse. Supervisor Grillo voted against the proposition. The policy calls for \$272, and runs for three years. With fire insurance, burglar insurance, treasurer's bondsmen and night watchman the county treasury ought to be safe from any kind of attack. The graft danger is about all that remains unprotected by insurance.

So the board was asked to donate from the county treasury toward this necessary and worthy object. Supervisor Burke objected, deeming it was a matter for the people of Jackson to attend to exclusively; that other graveyards had just as much claim upon the county funds as this one, where the county poor are interred. We shall discuss this question at length hereafter, Suffice it to say that nothing was donated, and no vote taken, the view of Supervisor Burke was practically accepted, except a protest from one or two

SUIT. As a side issue of the Nevills-Flemsons visited the Mammoth tunnel at Middle Bar last Saturday. Among defendant Fleming, Chas Turner, who was bookkeeper at the mine when it was running some twenty years ago, H. D. Emerson, J. L. Sargent, N. P. Williams, Chas. McKinney, and Mr Haven, the superintendent of the South Eureka, A. M. Hambric and W. E. Downs, surveyor. They inspected the unnel works and made some surveys.

On Monday the Nevills side had their inning with experts and made measurements and surveys to support the side of the controversy. W. S. Coulter was the surveyor, and A. Caminetti the attorney directing the matter. They were four days, finishing last evening. The case is still going on in San Francisco, and much feeling has been developed. A proposition was made from the Nevills side that if Fleming would bear his proportion of the cost of a fully equipped 40 stamp mill, to be erected on the property, Nevills would look to the output of the mine from the balance alleged to be due on the purchase of the interest of Fleming. On the other hand, the Fleming side made a counter proposition that for the payment of \$10,000 in cash said Fleming would thereupon deed.all his rights in the property to Nevills.

About tion from Dr. Staples' native town, ing a case since the Lewis-Libbie murder, which mystery has never been solved; this happened about 25 years ago. Although the Staples case happened many thousands of miles away, yet nearly every one knew him here and are greatly surprised at the course he has taken, as he always bore an excellent reputation when he lived here. He had the best of bringing up; his parents have done everything in their power to bring him up in a god-fearing way, and gave him a good education. He was an unusually active member of the church, and a very popular young man throughout the town. He came from good tamilies on both sides. His grandfather, George Fredrick, is a man highly respected by every one, and is a man of some considerable means. This is a great blow to all of his folks and they have the heartfelt sympathy of all in their great sorrow. But it is the conviction of all, if he is guilty of the awful crime he should pay the penalty no sympathy for murderers here in Cemple.

From one of the doctor's early acuaintances. C. A. Norton.

A dastardly attempt was made or he morning of June 1st, to wreck the Angels mine at Angels Camp. Ninty holes were drilled, in several levels, and in such a manner that by simultaneous firing, it was thought to destroy the mine. Great damage, estimated at from five to twenty thousand dollars, was done. The deed is believed to be the outgrowth of changes in the management and discharge of responsible employes. Two men Saroni and Mitchell have been arrested charged with being concerned in the dynamite outrage.

Dr. Herrick, left this morning for San Francisco to attend the meeting of state board of dental examiners. After holding the examination in San Francisco the members will proceed to Los Angeles, and examine candidates there. The docter will be away two weeks.

Cynthia Love, granddaughter of Mrs. S. H. Boxall, left for the city this morning to be treated for her eyesight.

THE RAILROAD RIGHT OF WAY

settlement with the property holders

It seems that the effort to effect

along the line of survey of the road from the Oneida to Jackson have proved unavailing, and the prospects is that litigation will have to be resorted to under the law of eminent domain. Wiltord Dennis was out there the past week and found some of the property owners so extravagant in their demands for damages that there was no possibility of agreeing upon terms, without an appeal to law. One it is reported wanted \$3000, and was offered \$500. The disparty was so great that a meeting place was out of the question. It is rumored that the owners are standing together to prevent the road from coming to Jackson. The impression seems to be that by holding it at Oneida, Jackson Gate will be benefited to a greater extent than if it comes through to the county seat. This is short sighted policy, and one that is not likely to succeed. If litigation is had the chances are that the holders will get less than by a mutual arrangement out of court, with the cost of legal proceedings deducted

Meanwhile the grading of the main line between Uneida and Jackson is going ahead. Some 70 horses are employed. It does not look as if the railroad were going to quit because of the demands of some of the owners along the route.

the saloon men the code revision

bearing upon the restriction of

lone is practically a

saloons within certain limits of the state prisons and reformatories. There was no question about all the saloons coming within the two miles limit of the Preston school. The sheriff simply placed the law before them, because he had been notified by the meeting beld the previous week by the anti-saloon leagne. He went no further: it was not his place to take action. The violation of the provision is a misdemeanor and fall within the official duties of the constable. If the saloons sell liquor, a complaint will have to be made out, and a trial had in the justices' court. We understand the saloons have quit selling liquor. They are moved to this course as protection to their hondsmen. If a test were made, and the saloon-man convicted, the bondsmen would be liable for the amount of the bonds. \$1000, because of the sale contrary to law. It it were not for this, perhaps one saloon would continue and test of the law be made. But under the local ordinance the saloon men do not feel like exposing their bondsmen to unnecessary risks. So liquor at present can not be bought in lone. The saloons are running, selling temperances drinks and eigars, but strong drink is tabooed. The situation is mixed, and feeling runs high. that so sweeping a law should pass the legislature without detection of its import. For it is plain that it would not have passed had its true neaning been understood.

To help the situation it was suggested to repeal that portion of the county ordinance relating to giving bonds in the sum of \$1000. With this out of the way the saloonmen might gery. His office is at the corner of test the law; but as it stands they are not disposed to do so.

A BIRTHDAY PARTY.

Last Friday afternoon the home of Mr. and Mrs. Fred Datson, on Stump street, was the scene of a merry gatnering of the friends of little Willie Datson, who were helping him celebrate his second birthday. The children spent the afternoon in plaing all kinds of childish games on the lawn. Mrs. Datson served ice cream, cakes boxes of popcorn, and oranges, after which Mr. MacMillan photographed the company, much to the delight of the small people. Little Willie was the recipient of many gifts, as in Osgood Bros. drugstore in Oak- tokens of love of his little triends. Let go or die. That's the alternative of the shipwrecked man with the money bags. A great many people have a like alternative before them. Business men

bags. A great many people have a like alternative before them. Business men come to a point where the doctor tells them that they must "let go or die." Probably he advised a sea voyage or mountain air. There's an obstinate cough that won't be shaken off. The lungs are weak and perhaps bleeding. There is emaciation and other symptoms of disease, which if unskilfully or improperly treated terminate in consumption.

Thousands of men and women in a like condition have found complete healing by the use of Dr. Pierce's Golden Medical Discovery.

"It gives me pleasure to send you this testimonial so that some other poor sufferer may be saved, as I was, by Dr. Pierce's Golden Medical Discovery," writes Geo. A. Thompson, of Sheldon Ave., Chatham, Ont., Canada. "I had a cough for years, expectorated a great deal, and was slowly falling. Was losing flesh every day. Lost in weight from 150 pounds down to 128. My flesh got soft and I had no strength. Did not say anything to any one but made up my mind that the end was not far off. One day my wife was reading in the Common Sense Medical Adviser' about Dr. Pierce's Golden Medical Discovery, and I said, that sounds more like common sense than anything else that I had heard. I at once bought a bottle of your famous remedy and before I had taken half of one bottle I felt better. Took thirteen bottles and it made a new man of me. I gained sixteen pounds and never have had a cough since. I feel splendid and give all the credit to your medicine."

Ours is your ancient pride, And, what'er may befall you, Our place is at your side!" Ours are the old traditions Of Saxon and of Kelt;

AMERICA TO ENGLAND.

We visit rare Westminister And kneel where you have knelt. Your restful country places, Hills, lakes and London town-Their memories we inherit And share their won renown

Your Avon is our Avon; Song knows no border line: The stars their radiance mingle Which in one heaven shine. Within your "Poet's Corner" Longfellow's gentle grace With all the august shadows Is given a welcome place.

Your mighty men of science Who've made the world anew, Transforming earth and heaven, Wrought not alone for you. From Newton up to Darwin Each from his truth built throne

ou fought the fight for freedom And taught mankind the creed; Long ere our "Declaration" There was a Runnymede. We won at Appomattox, But you had won before; Our Bunkerhil! and Yorktown Look back to Marston Moor.

Nods greeting to our homage-

We claim them for our own.

Our Washington and Lincoln Were of your sturdy stock, Cut out of Milton's quarry One piece with Cromwell's rock. Our pilgrims learned the lessons That English means the free, And through the wintry weather They brought it over the sea. Here in the west grown mighty

We look back to the home land And feel the thrill of kin. Then let us stand together Till over all the earth Our manhood and our freedom In every land have birth. One vision let us cherish-That as the years increase

We too may teach the nations

O'er Neva or the Rhine

To love and welcome peace.

But should the war cloud gather

And should the threatening navies

Though we alone might win,

Wheel into silent ilne. Then when the peaceful heavens Are darkened in eclipse, May our two lightnings mingle One thunder from our ships. We need but stand together To hold the world in fee And to the noblest issues

Control the age to be.

Then let this glorious vision

Along our pathway gleam

As up the future leads us The seer's, the poet's dream. one race and one tradition, English, American, and one high inspiration, The destiny of man!

There is a Difference. The difference between Kennedy's axative Honey and Tar and all other Cough Syrups is that it moves the lowels, thus expelling a cold from the system. This relaxes the nerve tissues and by its healing effect on the throat and lungs the cough is relieved cured entirely. Kennedy's is the original Laxitive Honey and Tar and contains no opiates. Good alike for young or old. Tastes good. Sold by
